Contributors, *v*

Preface: **Advances in Clinical Radiology**, *xv*

By Frank H. Miller

State-of-the-Art Dual-Energy Computed Tomography in Gastrointestinal and Genitourinary Imaging, *1*

By Ashish Khandelwal, Achille Mileto, Shuai Leng, and Joel G. Fletcher

Introduction, *1*

Considerations when designing acquisition and reconstruction protocols, *2*

Organ-specific advances and uses, *2*

Genitourinary system, *2*

Gastrointestinal system, *4*

Liver mass evaluation, *4*

Pancreaticobiliary applications, *7*

Bowel imaging applications, *8*

Trauma, *12*

Standardization of displays, *12*

Virtual noncontrast imaging strengths and weaknesses, *13*

Matched use of virtual noncontrast imaging and iodine maps, *13*

Low iodine imaging, *13*

Workflow and integration into heterogeneous practices, *13*

Photon-counting computed tomography, *14*

Summary, *14*

Digital Mammography, *19*

By Katherine E. Conlon, Lucy Lester, and Sarah M. Friedewald

Benefits of mammography, *19*

Digital mammography, *19*

Radiation dose with digital mammography, *20*

Technical considerations with digital mammography, *20*

Transition to digital mammography, *21*

Digital breast tomosynthesis, *21*

Digital breast tomosynthesis and national guidelines, *22*

Transition to digital breast tomosynthesis, *23*

Technical considerations with digital breast tomosynthesis, *23*

Synthetic imaging, *23*

Digital breast tomosynthesis-guided biopsy, *24*

Summary, *24*

Cardiac MRI T1, T2, and T2* Mapping in Clinical Practice, *27*

By Gauri Rani Karur and Kate Hanneman

Introduction, *27*

Significance, *27*

Technical considerations, *27*

Clinical applications, *31*

Present relevance and future avenues, *37*

Summary, *37*

Four-Dimensional Flow Magnetic Resonance Imaging in Cardiothoracic Imaging, *43*

By Bradley D. Allen, Nicholas S. Burris, Pamela J. Lombardi, and Christopher J. Francois

Introduction, *43*

Significance, *44*

Phase-contrast magnetic resonance imaging, *44*

Four-dimensional flow magnetic resonance imaging, *44*

Clinical applications, *46*

Future directions, *50*

Aortic dissection, *50*

Diastolic dysfunction, *51*

Summary, *51*

Quantitative MRI Biomarkers of Diffuse Liver Disease, 55

By Michael C. Olson, Scott B. Reeder, and Sudhakar K. Venkatesh

- Introduction, 55
- Evaluation of hepatic fat content, 56
- MRI evaluation of hepatic fat content, 56
- Quantitative chemical shift–encoded MRI, 57
- Proton density fat fraction and R2* maps, 58
- Applications, 59
- Limitations, 59
- Evaluation of hepatic fibrosis, 60
- Magnetic resonance evaluation of fibrosis:
 - magnetic resonance elastography, 61
- Elastograms, 62
- Applications, 62
- Advances in liver magnetic resonance elastography, 63
- Limitations, 64
- Summary, 66

Radiogenomics of Oncology: Current Trends and Future Directions, 71

By Jason Chiang and Neema Jamshidi

- Brain, 72
- Lung, 73
- Liver, 74
- Kidney, 75
- Prostate, 75
- Breast, 76
- Abscopal effects, 77
- Current challenges and limitations, 77
- Future directions, 78

Deep Learning in Musculoskeletal Imaging, 83

By Fang Liu and Richard Kijowski

- Introduction, 83
- Overview of deep learning, 84
- Tissue segmentation, 85
- Image reconstruction, 87
- Disease detection, 88
- Summary, 91

Lung Cancer Screening, 95

By Brett W. Carter

- Introduction, 95

- Communication of low-dose computed tomography results, 96
 - Lung CT screening reporting and data system, 96*

Underserved populations, 100

Incidental findings, 101

Background, 101

Classification, 102

Reporting and management, 103

Radiomics, 103

Biomarkers for lung cancer screening, 104

Summary, 104

Quantitative Computed Tomographic Evaluation of Lung Nodules, 109

By Jeffrey B. Alpert

- Introduction, 109
- Nodule diameter, volume, and mass, 110
- Understanding radiomics, 111
 - Considering histogram features, 111*
- Quantitative computed tomography and lung nodules: clinical applications, 113
- Current challenges, 116
- Summary, 117

Transcatheter Aortic Valve Replacement: Preprocedure and Postprocedure Imaging, 119

By Htin Aung, Eric E. Williamson, and Satinder P. Singh

- ▶ Video content accompanies this article at www.advancesinclinicalradiology.com.

Introduction, 119

Background, 120

Development of transcatheter aortic valve replacement, 120

Pretranscatheter aortic valve replacement imaging, 122

Echocardiography, 122

Multidetector computed tomography, 123

Image acquisition, 123

Measurements, 123

Access site measurements, 126

Transfemoral, 126

Transapical, 126

Other access sites, 126

Alternative imaging modalities, 129

Special cases, 129
 Complications, 130
 Valve thrombosis, 132
 Summary, 133

Fetal Neuroimaging, 135

By Thierry A.G.M. Huisman

Introduction, 135
 Significance, 135
 Anatomic and advanced fetal magnetic resonance imaging sequences, 136
 Feto-maternal unit, 136
 Significance of serial or follow-up fetal MRI examinations, 139
 Isolated finding or part of a syndrome, *quo vadis?*, 140
 Concept of fetal malformation, disruption, and destruction and timing of injury, 141
 Multilevel fetal abnormality benefits from a large field of view, 144
 Fetal/maternal incubator, 144
 Magnetic resonance pelvimetry and fetal MRI, 145
 Chiari 2 and open spinal dysraphia, fetal interventions, 146

Neuroendocrine Imaging: Pathology, Clinical Algorithms, Imaging Appropriateness, and Management of Incidental Findings, 151

By Judah Burns, Kevin Hsu, Keivan Shifteh, and Amichai J. Erdfarb

Introduction, 151
 Normal anatomy and imaging technique, 151
 Clinical syndromes, 154
 Imaging appropriateness, 155
 Imaging findings, 156
 Ectopic or absent posterior pituitary, 156
 Pituitary microadenoma, 157
 Pituitary macroadenoma, 157
 Pituitary apoplexy and abscess, 160
 Rathke cleft cyst, 160
 Craniopharyngioma, 161
 Lymphocytic hypophysitis, 161
 Tuber cinereum hamartoma, 163
 Other cystic lesions of the sella and suprasellar cistern, 163

Other suprasellar lesions of nonpituitary origin, 165
 Incidental findings, 166
 Summary, 168

Imaging of Sports Injuries of the Lower Extremity, 171

By Swati Deshmukh

Introduction, 171
 Imaging technique, 171
 Osseous sports injuries, 172
 Articular sports injuries, 173
 Ligamentous sports injuries, 176
 Muscular sports injuries, 177
 Tendinous sports injuries, 179
 Fascial/aponeurotic sports injuries, 181
 Summary, 182

Utility and Limitations of Multimodality Imaging for the Evaluation of Neuromas-in-Continuity in the Preoperative and Intraoperative Settings, 183

By Samir Abboud, Kulia Kakarala, Ankur Garg, Thomas Grant, Michel Kliot, and Imran M. Omar

Introduction, 183
 Pathophysiology, 184
 Treatment, 184
 Imaging strategy, 184
 Injury-grade specific imaging findings and pitfalls, 186
 Example: identifying severe injury, 186
 Example: identifying lower-grade injury and visualizing nerve healing/Regeneration, 186
 Example: identifying subtle injury, confirming preoperative diagnosis with ultrasound-guided percutaneous intervention, 189
 Current imaging limitations, 190
 Summary, 190

High-Resolution Magnetic Resonance Vessel Wall Imaging in Intracranial Atherosclerotic Disease, 193

By Ramez N. Abdalla, Donald R. Cantrell, Alireza Vali, Michael C. Hurley, Ali Shaibani, Timothy J. Carroll, and Sameer A. Ansari

Introduction, 193

Intracranial atherosclerotic disease
epidemiology and risk factors, 194

Intracranial atherosclerotic disease stroke
recurrence, 194

Intracranial atherosclerotic disease
management, 195

Luminal angiography limitations, 195

Intracranial atherosclerotic disease and
vulnerable plaque pathophysiology, 198

Intracranial atherosclerotic disease stroke
mechanisms, 199

Magnetic resonance vessel wall imaging
protocols, 200
Blood and cerebrospinal fluid suppression,
200
Spatial resolution , 200
Two-dimensional versus three-dimensional
protocols , 201
Field strength, 201
Image weighting, 201
Contrast injection, 201
Pulse gating, 201

Magnetic resonance vessel wall imaging:
normal intracranial vasculature, 202

Magnetic resonance vessel wall imaging:
intracranial atherosclerotic disease, 203

Magnetic resonance vessel wall imaging in
differentiating intracranial stenoses,
occlusions, and vasculopathies, 209

Magnetic resonance vessel wall imaging
limitations and future considerations, 209

Summary, 209

**Advances in the Ablative Management of
Hepatocellular Carcinoma, 215**

*By Beau B. Toskich, Ryan E. Bailey,
Sadeer J. Alzubaidi, Zlatko Devcic, Gregory T. Frey,
Andrew R. Lewis, Michael R. Moynagh, Kabir Mody,
Charles A. Ritchie, Terence T. Sio, Tushar Patel, and
Ricardo Paz-Fumagalli*

Introduction, 215

Radiofrequency ablation, 216

Microwave ablation, 216

Cryoablation, 216

Irreversible electroporation, 217

Transarterial radioembolization, 217

Stereotactic body radiotherapy, 218

Ethanol therapy, 219

Emerging therapies, 219

Transarterial chemoembolization combination
therapies, 220

Ablative-systemic combination therapies, 221

Ablation and immunotherapy, 221

Future considerations, 222

New Frontiers in Embolization, 227

*By Sandeep Bagla, Rachel Piechowiak, and
Ari Isaacson*

Geniculate artery embolization, 227

Prostate artery embolization, 229

Vertebral Augmentation, 233

*By Nicole S. Carter, Julian Maingard, Ronil V. Chandra,
Hamed Asadi, and Joshua A. Hirsch*

Introduction, 233

Considerations in procedural technique, 234
Indications, 234
Contraindications, 234
Preprocedural imaging, 234
Image guidance, 234
Special considerations, 234

Evidence for efficacy, 235
Vertebroplasty, 235
Kyphoplasty, 237
Comparing vertebroplasty with kyphoplasty,
238

Evidence for safety, 238
Overall complications, 238
Cement leakage, 238
Subsequent vertebral fractures, 239
Mortality benefit?, 239

Summary, 240

**Interventional Radiology in the Era of
Immuno-Oncology: Impact and
Opportunity, 243**

By Matthew A. Chiarello and Ryan M. Hickey

Introduction, 243

Background, 244
Immune system function and activation, 244
Key checkpoints in the immune activation
pathway, 244
T-cell exhaustion and the tumor
microenvironment, 244
Role of the regulatory T cell, 245

Immunosuppressive mechanisms in the liver,
245

Liver-specific immune surveillance, 245

*Chronic liver inflammation and the tumor
microenvironment of hepatocellular
carcinoma, 245*

Immunotherapy and locoregional therapies, 245

Thermal and chemical ablation, 246

Transarterial therapies, 246

Radioembolization and immunotherapy, 247

Future perspectives, 248

Summary, 248

**Endovascular Management of Acute Lower
Extremity Deep Vein Thrombosis: Rationale
for Use and Lessons Learned from
Emerging Clinical Trials, 251**

*By Kush R. Desai, Simer Grewal, Raj Shah, and
Suresh Vedantham*

Introduction, 251

Pathophysiology of postthrombotic syndrome,
252

Assessment of postthrombotic
syndrome, 252

Rationale for thromboreductive
therapies, 253

Early supportive studies, 253

Prospective evaluation of catheter-directed
thrombolysis in postthrombotic syndrome
prevention: the catheter-directed venous
thrombolysis in acute iliofemoral vein
thrombosis trial, 253

Pharmacomechanical thrombectomy and the
acute venous thrombosis: thrombus removal
with adjunctive catheter-directed
thrombolysis trial, 254

Future directions, 255
