Systemic Therapy in Lung Cancer: Imaging Considerations, 1

By Richard Thomas, Marta Braschi-Amirfarzan, and Rachna Madan

Introduction, 1

Guidelines for systemic therapy for lung cancer, 2

Non-Small Cell Lung Cancer, 2

Small Cell Lung Cancer, 3

Role of imaging in following disease kinetics and monitoring response to therapy, 4

Tumor Response Criteria, 5

Atypical Response, Pseudoprogression, and Hyperprogression, 5

Resistance, 8

Image-Guided Biopsy, 8

Role of imaging in monitoring treatment-related toxicity, 9

Imaging as a component of multidisciplinary oncology, 12

Future directions, 12

Summary, 13

Disclosure, 13

Computed Tomography in the Evaluation of Pulmonary Hypertension, 17

By Seth Kligerman, Lewis Hahn, and Elizabeth Weihe

Pulmonary hypertension, 17

Computed tomography pulmonary angiography, 17

Common findings in patients with pulmonary hypertension, 18

Dilatation of the Pulmonary Arteries, 18

Right Heart Findings, 19

Chronic thromboembolic pulmonary hypertension, 20

Pulmonary hypertension caused by left heart disease, 23

Pulmonary hypertension caused by lung disease or hypoxia, 26

Chronic Obstructive Pulmonary Disease, 26

Interstitial Lung Disease, 27

Sleep-Disordered Breathing, 27

Pulmonary hypertension with unclear multifactorial mechanisms, 28

Sarcoid, 28

Fibrosing Mediastinitis, 28

Vasculitis, 29

Pulmonary arterial hypertension, 30

Summary, 33

Disclosure, 33

Advances in Imaging of Adult Congenital Heart Disease, 37

By Clinton E. Jokerst and Kristopher W. Cummings

Introduction, 37

Significance, 37

General content, 38

Advances in Computed Tomography:

Iterative Reconstruction, 38

Advances in Computed Tomography: Metal

Artifact Reduction, 38

Advances in Computed Tomography:

Improved X-Ray Tubes, 39

Advances in Magnetic Resonance:

Compressed Sensing, 39

Advances in Magnetic Resonance: Four-

Dimensional Flow, 39

Advances in Magnetic Resonance: Scanning

Pacemaker Patients, 43

Advances in Postprocessing: Automation, 47

Advances in Postprocessing: Three-Dimensional Printing, 48

- Discussion, 49
 - Repaired Tetralogy of Fallot*, 49
 - D-Transposition of the Great Arteries: Atrial Switch (Intra-Atrial Baffle)*, 54
 - D-Transposition of the Great Arteries: Arterial Switch Operation*, 59
- Summary, 60
- Disclosure, 60

Artificial Intelligence in Cardiopulmonary Imaging, 65

By Jessica Chan and William F. Auffermann

- Introduction, 65
- Introduction to artificial intelligence, 65
- Detection, 66
- Characterization, 69
 - Characterizing Pulmonary Nodules*, 69
 - Predicting Survival in Lung Cancer*, 69
 - Classifying Interstitial Lung Disease*, 70
- Segmentation, 70
 - Introduction to Segmentation*, 70
 - Applications in Cardiovascular Imaging*, 72
 - Applications in Thoracic Imaging*, 72
- Case study: pulmonary nodules, 72
- Case study: cardiac computed tomography imaging, 74
 - Identification of Key Cardiac Landmarks*, 74
 - Coronary Calcium Scoring*, 74
 - Coronary Artery Segmentation, Coronary Stenosis Estimation, and Coronary Plaque Composition*, 74
 - Computed Tomography Fractional Flow Reserve*, 74
- Case study: urgent findings, 76
- Will computers replace clinicians?, 76
- Summary, 77
- Disclosure, 77

Update in Imaging of Idiopathic Pulmonary Fibrosis, 81

By Katherine A. Kaproth-Joslin, Mary Frances A. Croake, and Stephen B. Hobbs

- Introduction, 81
- Imaging modalities, 82
- Society guidelines, 84
- Imaging findings and diagnostic criteria, 85

- Typical Usual Interstitial Pneumonia Computed Tomographic Pattern Imaging Findings*, 86
- Probable Usual Interstitial Pneumonia Computed Tomographic Pattern Imaging Findings*, 86
- Indeterminate Usual Interstitial Pneumonia Pattern Imaging Findings*, 87
- Nonspecific Interstitial Pneumonia, 87*
- Connective Tissue Disease–Associated Interstitial Lung Disease*, 88
- Chronic Hypersensitivity Pneumonitis*, 88
- Sarcoidosis*, 89
- Chronic Aspiration*, 90

Complications of usual interstitial pneumonia, 91

- Acute Exacerbation of Usual Interstitial Pneumonia*, 91
- Combined Pulmonary Fibrosis and Emphysema*, 92
- Lung Cancer*, 92
- Pulmonary Hypertension*, 93
- Infection*, 94

Templated reporting, 95

Multidisciplinary discussion and idiopathic pulmonary fibrosis, 95

Quantitative imaging and machine learning in idiopathic pulmonary fibrosis, 96

Treatment, 97

Summary, 98

Disclosure, 98

Bariatric Embolization: Is There a Role for Interventional Radiology in the Treatment of Obesity?, 101

By Jenanan P. Vairavamurthy, Omid Shafaat, and Clifford R. Weiss

- Introduction, 101
- Current obesity therapy, 102
 - Lifestyle Modifications*, 102
 - Bariatric Surgery*, 102
 - Pharmacotherapy*, 104
 - Endoscopic Bariatric Techniques*, 105
- Bariatric embolization, 107
- Summary, 110
- Disclosure, 110

Contemporary Techniques and Applications of Radioembolization in Patients with Hepatocellular Carcinoma: Y90 from Palliative to Curative, 113

By Ahmed Gabr, Pouya Entezari, Ahsun Riaz, Riad Salem, and Robert J. Lewandowski

- Introduction, 113
- Planning and treatment, 114
 - Planning Angiography and Technetium 99m Macroaggregated Albumin Scan, 114*
 - Estimating Treatment Dose, 114*
 - Radioembolization, 115*
- Current and evolving Y90 techniques, 115
 - Radiation Segmentectomy, 115*
 - Radiation Lobectomy, 115*
 - Modified Radiation Lobectomy, 116*
- Posttreatment follow-up, 116
- Applications and outcomes, 118
- Early-stage hepatocellular carcinoma:
 - Barcelona Clinic Liver Cancer 0/A, 119*
- Intermediate stage hepatocellular carcinoma:
 - Barcelona Clinic Liver Cancer B, 119*
- Advanced Stage Hepatocellular Carcinoma: Barcelona Clinic Liver Cancer C, 120*
- Terminal Stage Hepatocellular Carcinoma: Barcelona Clinic Liver Cancer D, 121*
- Treatment Intent of Y90: Palliative Versus Curative, 121*

Transradial Access in Interventional Radiology, 127

By Joseph J. Titano, Rahul S. Patel, and Aaron M. Fischman

- Introduction, 127
- Analysis, 127
 - Brief History of Radial Artery Access, 127*
 - Anatomic Considerations, 128*
 - Transradial Access Across the Spectrum of Interventional Radiology, 129*
 - Impact of Transradial Access on the Practice of Interventional Radiology, 129*
 - Learning Curve, Radiation, and Safety Concerns Specific to Transradial Access, 130*
- Future avenues, 135
 - Length Limitations and the Treatment of Peripheral Arterial Disease, 135*

- Distal Radial Access, 135*
- Summary, 135
- Disclosure, 136

Clinical Image-Guided Ablation for Thyroid Malignancy with Proposed Thyroid Segmentation System, 139

By Alan Alper Sag, Hadiza S. Kazaure, Jennifer M. Perkins, Jennifer H. Choe, Daniel J. Roche, Tony P. Smith, and Randall P. Scheri

- Introduction, 139
- Clinical image-guided ablation for thyroid malignancy, 139
- Normal anatomy, pearls, pitfalls, variants, and imaging considerations for ablation, 143
 - Recurrent Laryngeal Nerve, 143*
 - Superior Laryngeal Nerve, 145*
 - Vagus Nerve, 145*
 - Parathyroid Gland, 145*
 - Esophagus, 146*
 - Trachea, 146*
 - Strap Muscles and Cricothyroid, 146*
 - Skin, 146*
- Proposed thyroid segmentation system, 146
- Summary, 147
- Disclosure, 147

Liver Imaging Reporting and Data System: Current Challenges and Future Directions, 151

By Victoria Chernyak and Claude B. Sirlin

- Introduction, 151
- Liver Imaging Reporting and Data System computed tomography/magnetic resonance imaging diagnostic algorithm: background, 152
- Liver Imaging Reporting and Data System population, 152
- Evidence supporting Liver Imaging Reporting and Data System evolution, 152
- Development of standard lexicon for clinical care, research, and education, 155
- Algorithm simplification, 155
- Intermodality agreement, 155
- Inter-reader agreement, 157
- Ancillary features, 157
- Cross-modality integration, 158

Assessment of washout with gadoxetate, 158
 LR-M category, 158
 Rim versus nonrim arterial-phase
 hyperenhancement, 159
 Systems unification—is it possible?, 159
 Future technological advances, 159
 Summary, 160
 Disclosure, 160

The Future of PET-MRI Beyond “PET Plus MRI”: Initial Failure of Utilization Potential and Pathways to Success, 165

By Babak Saboury, Michael A. Morris, Austin J. Borja, and Abass Alavi

Introduction, 165
 Present clinical applications of PET-MRI, 167
 Brain, 167
 Alzheimer's Disease and Other Cognitive Disorders, 168
 Cerebrovascular Disease, 168
 Seizure Disorders, 170
 Brain Tumors, 170
 Traumatic Brain Injury, 170
 Cardiac, 171
 PET-MRI-Based Cardiac Perfusion Imaging, 171
 PET-MRI for Viability, 171
 Inflammation, 171
 MRI and Atherosclerosis, 172
 PET and Atherosclerosis, 172
 PET-MRI and Atherosclerosis, 172
 Sarcoidosis, 172
 MRI in Sarcoidosis, 172
 PET in Sarcoidosis, 173
 Hybrid PET-MRI in Sarcoidosis, 173
 Cancer, 174
 Prostate, 174
 Liver, 176
 Musculoskeletal, 180
 Nonmalignant diseases and disorders, 182
 Discussion, 183
 Improved Quantification Is the Name of the Game: Toward the Integrated and Synergistic Approach, 183
 Past to Present: Truth in Data, 183
 Present to Future: Downfall or Resurrection, 185

Summary, 185
 Disclosure, 185

Multidetector Computed Tomography of Pediatric Vascular Imaging with Advanced Postprocessing Techniques, 191

By Alison Hart and Edward Y. Lee

Introduction, 191
 Imaging techniques, 191
 Pediatric Patient Preparation, 192
 Intravenous Contrast, 192
 Advanced Postprocessing Techniques, 192
 Spectrum of pediatric thoracic vascular disorders, 193
 Vascular Rings and Sling, 193
 Total and Partial Anomalous Pulmonary Venous Return, 197
 Interrupted Aortic Arch, 200
 Coarctation of Thoracic Aorta, 200
 Tetralogy of Fallot, 202
 Spectrum of pediatric abdominal vascular disorders, 207
 Renal Artery Stenosis, 207
 Middle Aortic Syndrome, 208
 Aortic Thrombosis, 208
 Hepatic Arterioportal Fistula, 208
 Summary, 209

Contrast-Enhanced Ultrasonography of the Abdomen: Ready for Prime Time!, 213

By Stephanie R. Wilson and Richard G. Barr

▶ Video content accompanies this article at <http://www.advancesincosmeticsurgery.com>.
 Introduction, 213
 Microbubble Contrast Agents, 214
 Technique for Contrast-Enhanced Ultrasonography, 214
 Liver contrast-enhanced ultrasonography, 214
 Interpretation of Liver Contrast-Enhanced Ultrasonography, 214
 Liver Metastases, 215
 Hepatocellular Carcinoma, 217
 Intrahepatic Cholangiocarcinoma, 219
 Liver Reporting & Data System, 220
 Variations Between Contrast-Enhanced Ultrasonography, Computed

- Tomography, and Magnetic Resonance Scans, 221*
- Liver Contrast-Enhanced Ultrasonography Today, 221*
- Kidney contrast-enhanced ultrasonography, 221
- Normal Contrast-Enhanced Ultrasonography*
- Renal Enhancement, 222*
- Benign Renal Masses, 222*
- Contrast-enhanced ultrasonography beyond the liver and the kidney, 226
- Pancreas Contrast-Enhanced Ultrasonography, 226*
- Spleen Contrast-Enhanced Ultrasonography, 226*
- Gastrointestinal Tract Contrast-Enhanced Ultrasonography, 226*
- Endovascular Aortic Repair, 227*
- Pediatric Contrast-Enhanced Ultrasonography, 229*
- Contrast-Enhanced Ultrasonography in Interventional Radiology, 230*
- Summary, 231

Utility of Ultrasound for Evaluating Masses in the Pediatric Population, 235

By Benjamin LeMoine and Jonathan D. Samet

- Introduction, 235
- Patients and methods, 235
- Results, 237
- Discussion, 239
- Overview of commonly encountered pediatric musculoskeletal soft tissue masses, 241
- Cystic lesions, 241
- Popliteal Cyst (Baker Cyst), 241*
- Ganglion Cyst, 242*
- Ganglion Cyst of Flexor Tendon Sheath, 242*
- Vascular lesions, 242
- Lipomatous lesions, 243
- Traumatic lesions, 243
- Nerve Injury, 243*
- Morel-Lavallé, 243*
- Pseudoaneurysm, 243*
- Malignant lesions, 243
- Lesions with characteristic locations (not previously discussed), 243

- Subcutaneous Granuloma Annulare, 243*
- Giant Cell Tumor of the Tendon Sheath, 244*
- Nerve Sheath Tumors, 244*
- Other, 244
- Pilomatricoma, 244*
- Summary, 244
- Disclosure, 244

Particulate vs Nonparticulate Steroids, a Discussion on Safety and Efficacy, 247

By Wyatt Kupperman and Kush K. Goyal

- Introduction, 247
- Anatomic considerations, 247
- Technical considerations, 250
- Live fluoroscopy and digital subtraction angiography as safe practice, 250
- Cervical transforaminal epidural steroid injection, 251
- Studies of efficacy: particulate versus nonparticulate, 251
- Conclusion, 253
- Disclosure, 254

Compressed Sensing MRI: Technique and Clinical Applications, 257

By George R. Matcuk Jr., Jordan S. Gross, and Jan Fritz

- Introduction, 257
- Technique, 258
- Clinical applications, 259
- Dynamic Contrast-Enhanced MRI, 259*
- Cardiac MRI, 260*
- Magnetic Resonance Angiography, 260*
- Musculoskeletal MRI, 260*
- Metal Artifact Reduction MRI, 263*
- Brain and Spine, 265*
- Artifacts, 265
- Summary, 267
- Disclosure, 268

Application of Dual-Energy Computed Tomography in Bone Lesion Biopsy, 273

By Sean Dwijendra and Michael Burke

- Introduction, 273
- Normal anatomy and imaging techniques, 273
- Imaging protocols, 275

Imaging findings/pathology, 276
Diagnostic criteria, 278
Differential diagnosis, 281
Pearls, pitfalls, and variants, 281
 Pearls, 281
 Pitfalls, 282
 Variants, 282
What the referring physician needs to know, 283
Disclosure, 283

Artificial Intelligence and Machine Learning Applications in Musculoskeletal Imaging,

285

By Sheila Enamandram, Emir Sandhu, Bao H. Do, Joshua J. Reicher, and Christopher F. Beaulieu

Introduction, 285
Artificial intelligence: technical terms and concepts, 286
 Artificial Intelligence, 286
 Bayesian Networks, 286
 Machine Learning, 286
 Supervised and Unsupervised Learning, 286
 Neural Networks, 286
 Deep Learning, 286
Machine learning in musculoskeletal imaging, 287
 Bone Tumors, 287
 Trauma, 291
 Bone Age, 292
 Degenerative Changes, 292
 Data Sharing, 293
Discussion, 293
 Clinical Impact of Artificial Intelligence, 293
Summary, 294
Financial disclosures, 295

Advances in Intracranial Perfusion Imaging for Thrombectomy Patient Selection,

299
By Amanda Murphy, Mark W. Parsons, Andrew Bivard, and Richard I. Aviv

Introduction, 299
Background, 300
 Perceived Barriers to Multimodal Computed Tomography Scan Use, 300
 Delay Owing to Multimodal Computed Tomography Scan Use, 300

Multimodal Computed Tomography Radiation Dose, 300
Contrast-Induced Nephropathy, 300
Nonreproducibility of Computed Tomography Perfusion Imaging and Thresholds for Core Estimation, 301
Rationale for Multimodal Computed Tomography Scan Use with an Emphasis on Computed Tomography Perfusion Imaging, 302
Applications of Computed Tomography Perfusion Imaging Use in Acute Stroke, 302
Physiologic Patient Selection Rationale, 303
Computed Tomography Perfusion Imaging-Based Patient Selection for Endovascular Treatment Beyond 6 Hours, 303
Computed Tomography Perfusion Imaging-Based Patient Selection for Intravenous Thrombolysis After 4.5 Hours, 304
Computed Tomography Perfusion Imaging-Based Patient Selection for Endovascular Therapy at 6 or More Hours, 305
Pearls and Pitfalls of Computed Tomography Perfusion Imaging Interpretation, 306
Post Processing Errors, 311
Summary, 317
Disclosure, 317

Pediatric Ischemic Strokes,

319
By Boris Chulpayev, Steven Benitez, Sarah Van Dine, Amichai J. Erdfarb, Solomon L. Moshé, Karen Ballaban-Gil, Allan Brook, and Seon-Kyu Lee

Introduction, 319
Epidemiology, 320
Perinatal acute ischemic stroke, 320
Childhood acute ischemic stroke, 320
Diagnostic imaging, 320
 Computed Tomography Head, Computed Tomography Angiography Head and Neck, 320
 MRI Brain, Magnetic Resonance Angiography Head and Neck, 320
Conventional cerebral angiography, 321
Management, 322
Summary, 323

Disclosure, 323

Advances in Spine Tumor Imaging and Intervention, 325

By Wende N. Gibbs and Jonathan J. Rasouli

Introduction, 325

Conventional and advanced imaging, 325

MRI, 326

Computed Tomography Scans, 328

Nuclear Medicine, 329

Radiologic assessment and reporting, 332

Radiation Therapy and Surgery, 333

Evidence-Based Treatment Algorithms, 334

Radiologic Assessment, 335

Percutaneous treatment options, 337

Summary, 337

Disclosure, 337

Magnetoencephalography and Mild Traumatic Brain Injury, 341

By Amy L. Proskovec, Bhavya R. Shah, Frank F. Yu, Michael Achilleos, Joseph A. Maldjian, and Elizabeth M. Davenport

Introduction, 341

Mild traumatic brain injury, 341

Magnetoencephalography, 342

Abnormal slow wave activity in mild traumatic brain injury, 343

Detection Rates Outperform Other Neuroimaging Modalities, 343

Sensitivity to Axonal Injury, 345

Patient Specificity and Relation to Postconcussive Symptoms, 345

Implications for Treatment and Return to Activity Decisions, 345

Limitations, 346

Other areas of investigation, 346

Aberrant Gamma Activity in Mild Traumatic Brain Injury, 346

Functional Connectivity in Mild Traumatic Brain Injury, 346

Task-Based Magnetoencephalography in Mild Traumatic Brain Injury, 346

Pediatric Mild Traumatic Brain Injury, 347

Future avenues, 347

Pediatric Mild Traumatic Brain Injury, 347

Blast-Induced Versus Blunt-Trauma Mild Traumatic Brain Injury, 347

Longitudinal Assessment, 347

Subconcussive Impacts, 347

Summary, 348

Disclosure, 349
